

Product Guide

Secure It

YOUR GUIDE TO THE RIGHT LOCKER

Built Different. By Design.

We believe every student deserves the best possible learning environment. That's why every piece in our collections is innovatively designed to work together, to mix, match, stack and scale, creating flexible solutions that deliver real outcomes for schools, universities and learning spaces across Australia.

Our furniture isn't just built to look the part. With a stronger construction than the market benchmark, wide-ranging customisation options, and lengthy warranties as standard, VE Furniture is engineered for the long term because replacing and disposing of furniture shouldn't be part of your budget.

Designed for Learning.
Built for Life.

Being vertically integrated means we control every step of the process and pass those savings directly to you. We deliver exceptional value through thoughtful design, durable construction and quality materials, helping you maximise your budget without compromise.

When it comes to delivery, we're built around your schedule. Staged installation offered for larger projects. And underpinning everything is a genuine commitment to sustainability, from recycling techniques to smarter use of finite resources.

Every school is different. Every student is different. And every space tells a story about what a community believes learning should look like. That's why our collections are designed to adapt, giving architects, designers and educators the flexibility to mix, match and configure furniture that truly works for the people in it.

Because when a space is built right from the beginning, it keeps working for the students and staff who rely on it every single day.

Adrian Lim - CEO

A Quarter Century of Great Design.

For more than 25 years, VE Furniture has been designing and delivering furniture solutions for Australian schools. We know the sector, and we know what it takes to get it right.

The Journey From Idea to Install.

Working with VE Furniture

Whether you're planning a brand new space or refreshing an old favourite, working with us is a collaborative journey. We bring creativity, practicality and a whole lot of care to every project, big or small.

From Brief

Let's talk

It all starts with a good chat. We take the time to understand your goals, your challenges and the people who'll be using the space, from students and teachers to admin teams and the wider community.

Plan with purpose

Our space planning experts turn your ideas into possibilities. We'll sketch, measure, imagine and refine, ensuring every piece has a place and every place has a purpose.

To Install

Your style, your way

We offer colour consultations that help you shape a look and feel that inspires. Whether you're after warm and natural, bold and bright or calm and clean, we'll help you bring it to life.

We'll handle the heavy lifting

We organise delivery and installation with minimal fuss. Our team works with care, precision and a keen eye for getting it just right, so you can focus on what you do best.

Our Story

VE Furniture was built on a simple belief: that every student deserves a well-designed space to learn in. Over 25 years, that belief has taken us into hundreds of schools across Australia, delivering furniture solutions that stand up to real school life.

What started as a commitment to quality has grown into something broader, a genuine understanding of how educational environments work, what teachers need, what students respond to and what procurement teams can rely on.

Today we work across Government, Catholic and Independent school sectors, bringing the same care and attention to a single classroom refresh as we do to a full campus fit-out. Experience at scale, without losing the detail.

Our Promise

We don't chase trends. We design and build furniture that performs day after day, year after year. Our commitment to durability, sustainability and value runs through everything we make.

When you work with VE Furniture, you get more than a product. You get a team that takes your project seriously, from the first conversation to the final install and well beyond.

That means honest advice, realistic timelines and furniture that does exactly what it's supposed to do. No surprises, no shortcuts, just well-made products backed by people who genuinely care about getting it right.

Built to Last. Made to Matter.

Sustainability at VE Furniture starts in the design room. A large part of our range is designed with longevity in mind, making it easier to repair, refresh and extend product life. Our ISO 14001 certification holds us accountable to that standard across our operations and we carry the same expectation into the materials we choose.

Care & Conserve

The most sustainable piece of furniture is one that doesn't need replacing.

When furniture breaks, wears, or reaches the end of its school life, the default response is usually a skip bin and landfill. We think that's a waste of money, materials and the investment you've already made.

The VE Furniture Care & Conserve program gives Victorian schools a practical alternative. Whether you need a replacement part posted to your facilities team, a chair reupholstered or a truckload of old furniture collected and recycled responsibly, we can help.

ISO 14001 Certified

Our environmental management system is independently certified to ISO 14001. That means our sustainability commitments are audited, not just stated.

FSC + E0 Sourced Board

Every board product we manufacture uses FSC-certified timber and meets E0 emissions standards, the lowest formaldehyde classification available. That applies across our full range of tables, storage and mobile whiteboards.

Modular by Design

Where possible, our products are designed so individual components can be swapped out rather than the whole unit. Less waste, longer product life.

Independently Certified. Across the Board.

We hold ISO certification across three areas of our business: environmental management (ISO 14001:2015), quality management (ISO 9001:2015), and occupational health and safety (ISO 45001:2018). Each is independently audited and renewed. These certifications confirm that our sustainability commitments sit within a broader system of accountability.

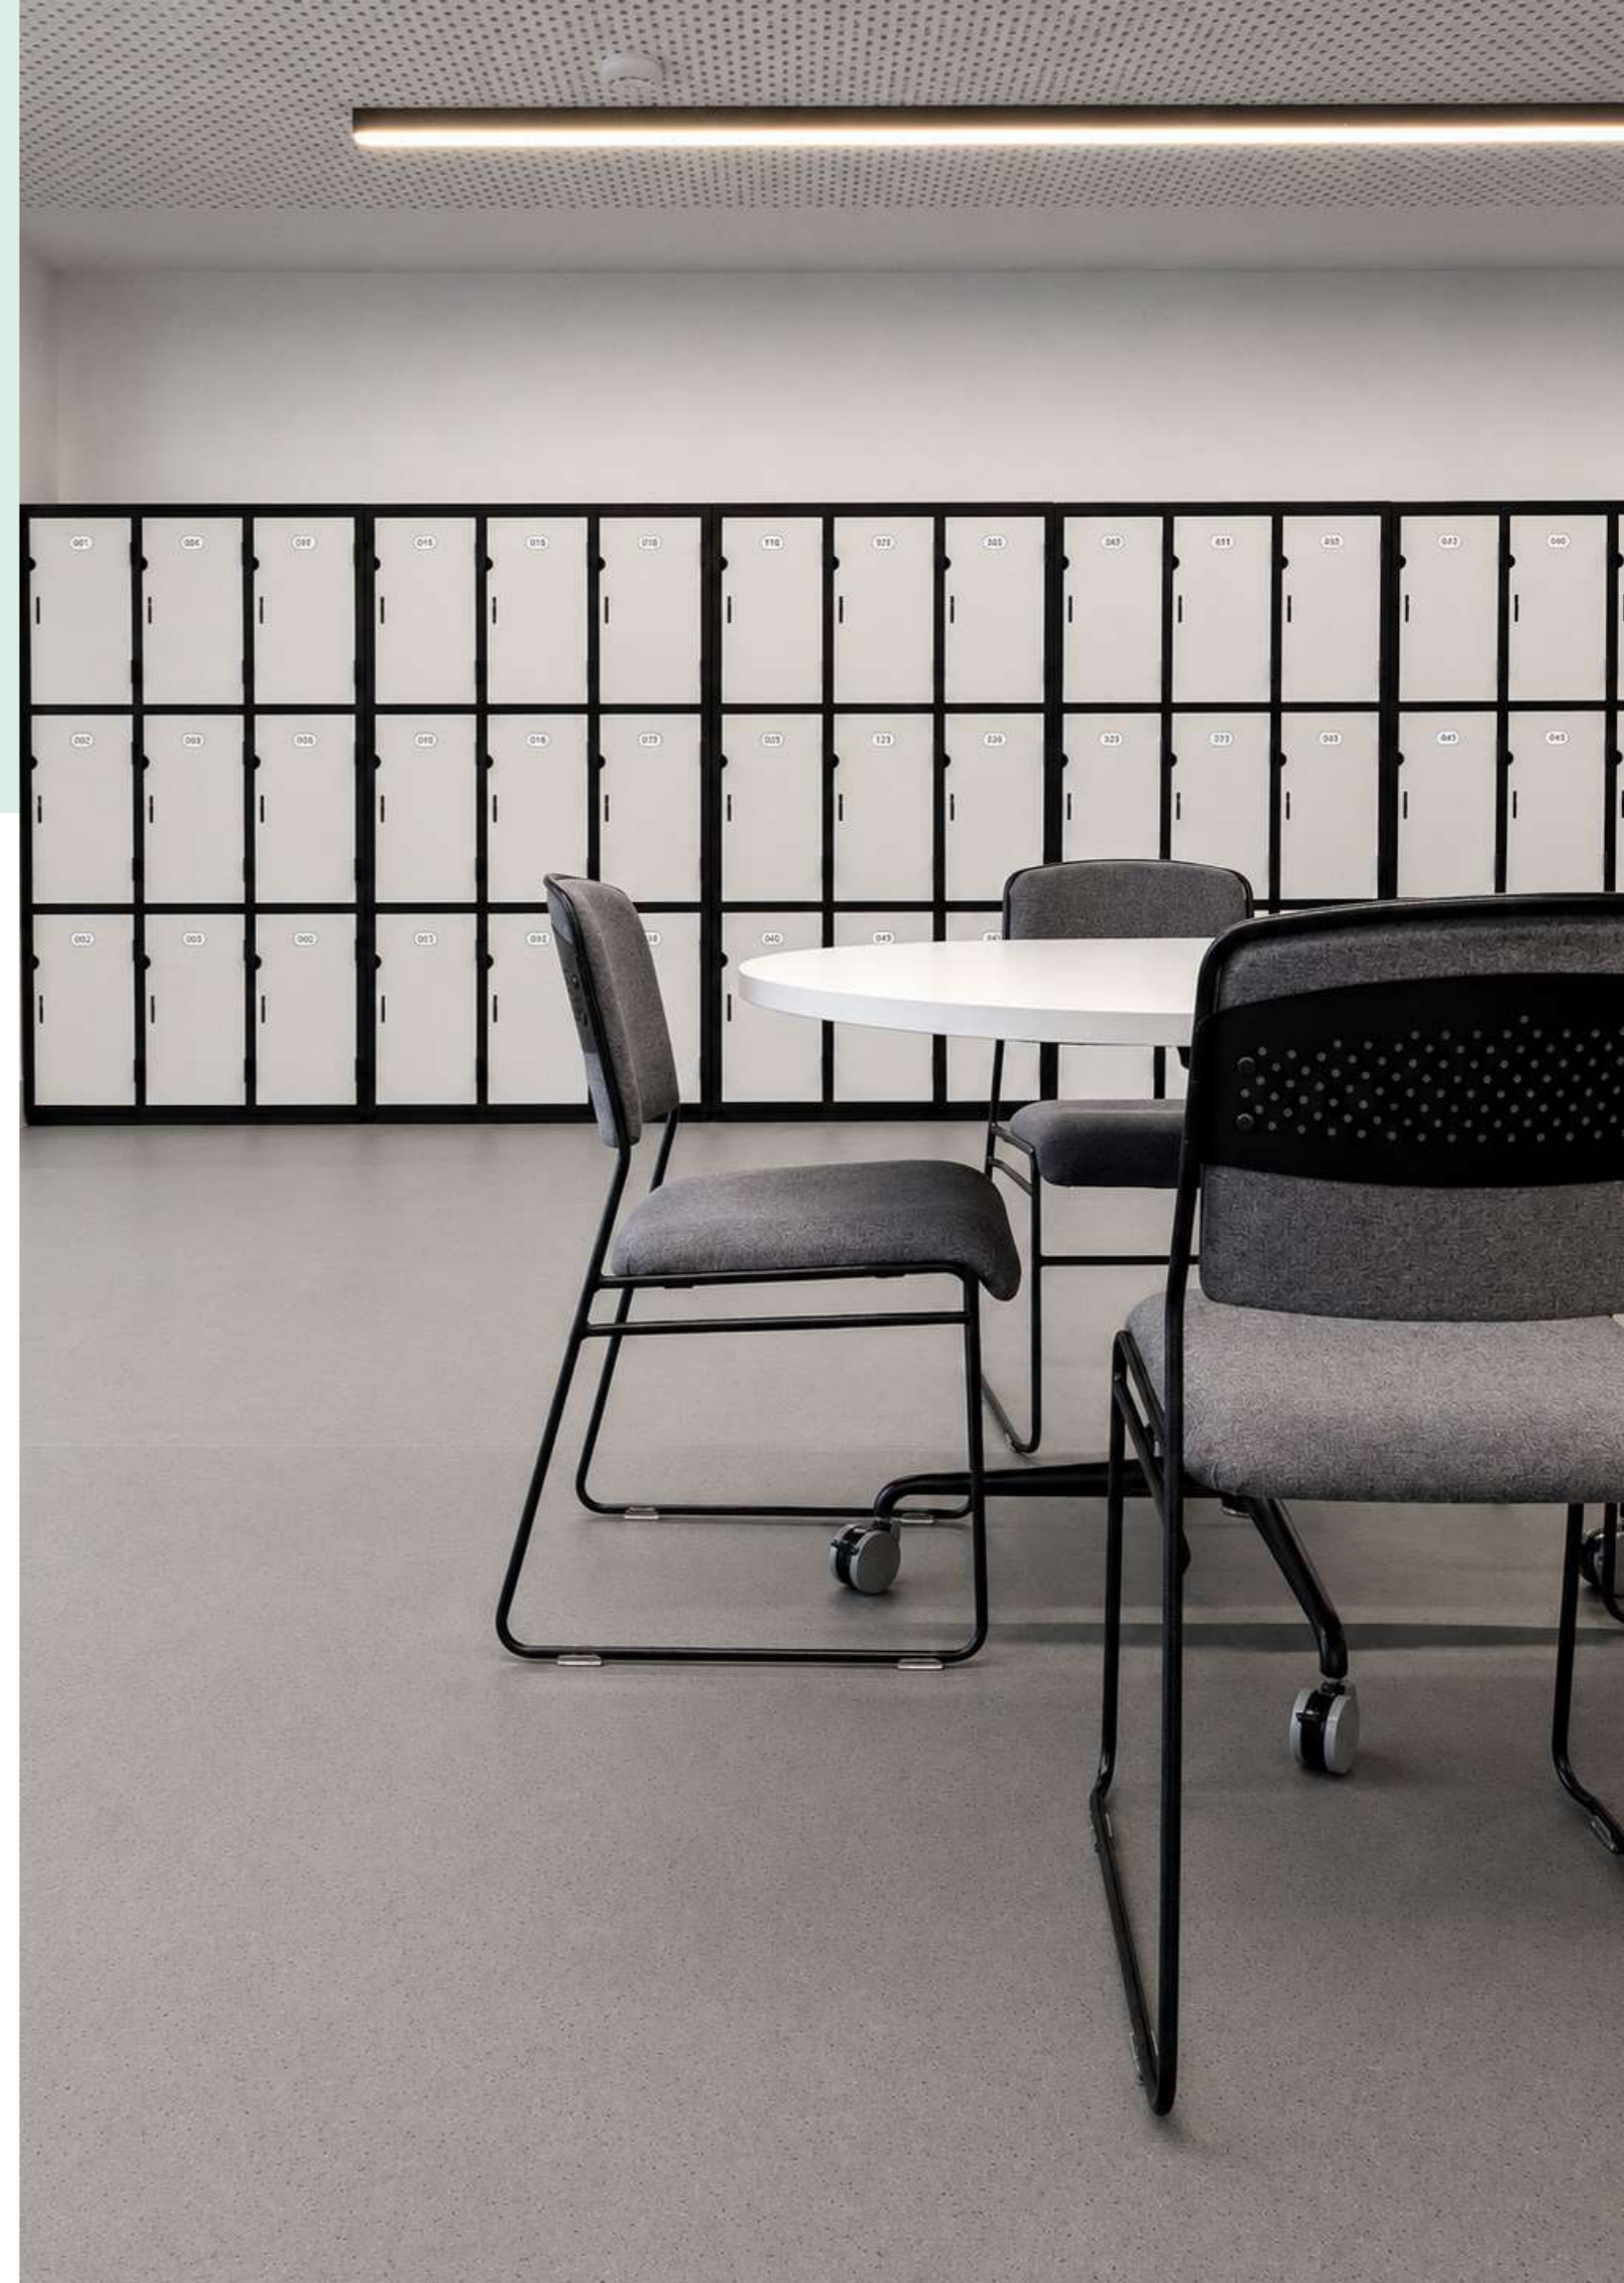

Delivered Assembled. Packaged Responsibly.

We deliver the majority of our products fully assembled and protected using reusable transport blankets, helping reduce the need for single-use cardboard, plastic wrap and disposable packaging materials wherever possible.

By delivering products ready to use, we also help minimise installation time and disruption on site. It's a practical approach that supports a cleaner delivery process, reduces unnecessary waste and keeps more packaging materials out of landfill before the furniture even reaches the classroom, library or workspace.

The Features.

Every component of the Secure It Modular Locker System has been engineered with purpose. From the tamper-proof hinges and moisture-resistant carcass to the flexible lock system and customisable accessories, nothing is an afterthought. Here's a closer look at what's behind the door.

Full Height Lockers.

The Secure It Full Height Lockers are the pinnacle of collective storage solutions, ingeniously designed to cater to the evolving demands of educational environments. These models stand out for their exceptional capacity and space efficient design, promoting both individual privacy and communal interaction.

Need flexibility? Secure It's mobile lockers can be repositioned as your space evolves, speak to our team about incorporating mobile options into your installation.

Locking Systems.

Security shouldn't be an afterthought. Every Secure It locker is available with a range of locking systems designed to suit your learning environment, the user, and the level of access control required. From simple padlock solutions to keyless digital entry.

LOC001

Protrusion Striker

Dimensions: W25 x D40 x H85
Compatible with most padlock options

The most durable solution in the range. The striker plate lock works with a standard padlock of your choice, giving facility managers full control over the type of security used. Ideal for schools and shared spaces where flexibility matters.

LOC005

Combination

Dimensions: W39 x D25 x H85
Four barrel combination lock with master key override

Eliminate the hassle of lost keys with a built-in combination lock. Users set their own code, making this a practical choice for high-turnover environments like schools, gyms and shared workplaces, no administration overhead, no locksmith call-outs.

LOC007

Push Button

Dimensions: W37 x D28 x H137
Tactile push button lock with master key override

A clean, contemporary locking solution for spaces where aesthetics matter as much as function. The push button lock offers quick, keyless access with a PIN code, a natural fit for design-conscious environments and modern workplace interiors.

The right lock turns a great locker into a complete, considered security solution.

Locking Accessories.

For spaces that require a more flexible approach to security, Secure It's padlock accessories pair seamlessly with striker plate lockers.

The Single Dial Combination offers a straightforward, single-handed operation perfect for younger users in school environments where simplicity is key. For applications demanding a higher level of security, the 4 Wheel Combination provides thousands of possible code variations, making it the preferred choice for architects and facility managers specifying lockers in higher-risk or multi-user settings.

Both options are designed to complement the full Secure It range without compromising the clean lines of the overall installation.

Simple to use.
Harder to compromise.

PAD001

Single Dial Combination

Pre-set code

PAD002

4 Wheel Combination

Reprogrammable code

Specifying lockers for a large project? Our locking accessories can be procured separately, giving you the freedom to standardise security across an entire facility. All accessories are compatible with the full Secure It range and can be supplied in bulk quantities to suit project timelines.

Not sure which lock type is right for your space? Our team works closely with architects, designers, and facility managers to identify the most appropriate solution for each application. From single-room installations to full campus rollouts, we're here to make the specification process as straightforward as possible.

Power Integration & Device Charging.

Secure It's built-in power integration options turn your lockers into charging stations, ready to go when the school day starts. Choose from three configurations to suit your infrastructure and the volume of devices being managed, from a simple single outlet to a combined GPO and USB solution.

ECH001
Echo Single GPO
Dimensions: Ø70
1x GPO Module

ECH002
Echo Single USB A/C
Dimensions: Ø70
1x USB A/C Module

ECH003
Echo Duo GPO USB A/C
Dimensions: W128 x D70
1x GPO + 1x USB A/C Module

24

GPOs Per Starter

A single starter socket powers up to 24 GPO modules, making it a practical and cost-effective solution for large-scale school installations without the need for extensive electrical work.

03

Device Types

Compatible with any GPO, USB-A, or USB-C powered device. Laptops, tablets, phones and more. No adaptors, no compatibility issues.

Infinite

Possibilities

One starter socket connection is all it takes to power multiple locker banks. Simple to specify, straightforward to install and built to grow with your school's device needs over time.

Getting cable access and starter socket placement right at the planning stage saves time, cost and disruption down the line, so it pays to think ahead.

Every school fitout is different, and getting the power configuration right from the start makes all the difference.

Before your installation begins, we recommend getting in touch so we can walk you through exactly what's needed. It's a simple conversation that saves significant time and cost down the track, and ensures your finished fitout looks and performs exactly as intended.

With Secure It's built-in power options, devices charge securely inside the locker between classes and overnight, reducing handling, minimising damage risk and freeing up classroom space for learning.

When devices are charged and ready at the start of every school day, teachers spend less time troubleshooting and more time teaching. Reliable access to fully charged devices supports consistent learning outcomes across the entire school, particularly in BYOD environments where students depend on their own devices throughout the day.

Identification & Number Plaques.

The finishing touch that makes a locker bank truly functional. Secure It's identification plaques are laser cut from durable thermoplastic and designed to integrate seamlessly with the overall aesthetic of your installation.

Beyond simple numbering, plaques can be customised to include additional information such as level or room details, making navigation intuitive in larger school environments where multiple locker banks are spread across a building.

A small detail that makes a big difference to the everyday user experience.

NUM001-P-WHT
Number Plaque 1a
Dimensions: W70 x D5 x H40
Pill shape - black on white

NUM001-P-BLK
Number Plaque 1b
Dimensions: W70 x D5 x H40

Rectangle shape - black on white

NUM002-P-BLK
Number Plaque 2b
Dimensions: W70 x D5 x H40
Rectangle shape - white on black

Optional Extras & Upgrades.

Unlock the full potential of your Secure It Lockers with our comprehensive range of accessories designed to enhance functionality and convenience. From personalised numbering systems for easy identification to innovative ventilation solutions.

NUM001
Number Plaque
Dimensions: W70 x H40
Range of options to choose from

VEN001
Ventilation Slot
Perforation: Two row pattern
Custom designs available

MAI001
Mail Slot
Dimensions: W225 x H10
Perfect for staff rooms

Sloping Canopy

The optional sloping canopy attaches seamlessly to the top of any Secure It locker, creating an angled surface that discourages items being left on top, keeping corridors tidy, reducing clutter, and maintaining the intended look of your installation from day one.

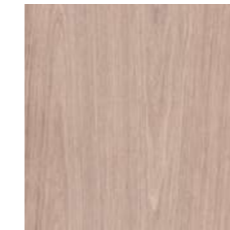

Available across the full Secure It range, it's an easy specification choice that pays for itself in reduced maintenance and a consistently polished finish.

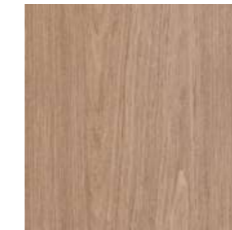

Materials & Finishes.

Dive into the world of bespoke storage solutions with Secure It's exquisite selection of Materials and Finishes, designed to reflect your style while prioritising sustainability and durability. Each material and finish has been carefully chosen to enhance the aesthetic appeal and functional longevity of your lockers, ensuring they seamlessly integrate into any school setting.

Your locker door is the first thing people see. Upgrading to **Duropact+** means a finish that lasts longer in any environment.

Duropact+ is Secure It's premium door finish, engineered for spaces that demand more than standard MDF can offer. Significantly stronger and more resistant to moisture, scratches and everyday wear, it's the natural choice for high-traffic school environments where durability is non-negotiable.

Available across our full standard colour range as well as an extended palette to match any interior specification.

Contracts & Certifications

Contracts and Procurement

Early Learning Education Resources

VE Furniture is a registered supplier on the N001493 Panel for Early Learning Childcare Centres: Education Resources for Learning and Play. This accreditation recognises our capacity to deliver high-quality, developmentally appropriate furniture and resources for early childhood education settings.

Victorian Government

VE Furniture is a registered supplier on the Victorian Government contract for the Supply of Office and Education Furniture to Victorian Government Schools. This accreditation recognises our ability to deliver high-quality, furniture solutions that support contemporary learning and staff environments across Victorian schools.

Certificates and References

We don't just talk the talk, we back it up with real action, real certifications and regular audits across our entire supply chain. From the factory floor to final delivery, we work with like-minded partners who share our commitment to doing better.
