Cleaning Guide

General Care Tips

Daily Care: Wipe the surface with a soft cloth dampened with warm water to remove dust, dirt and everyday marks. For routine cleaning, a mild detergent can be used to help lift grime while maintaining the finish of the product.

Deep Cleaning: For a more thorough clean, mix a small amount of mild dish soap with warm water and gently clean the surface using a soft cloth or sponge. Rinse with clean water to remove any residue and dry with a clean cloth to prevent streaks or water marks.

What to Avoid

Bleach and Harsh Chemicals: Avoid using bleach, acetone, solvent-based cleaners or harsh chemical products, as these may cause discoloration, surface damage or brittleness over time.

Abrasive Materials: Do not use steel wool, scouring pads or abrasive cleaning tools on polypropylene surfaces, as these can scratch and dull the finish.
